

Vežba 02

Potrebno je podesiti konfiguraciju servera sa vašim parametrima, koje ste dobili na studentskom mejlu.

1. Otvoriti link iz mejla i pristupiti konfigurisanju servera.

Welcome to Magento's Installation Wizard!

Open Software License ("OSL") v. 3.0

This Open Software License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following licensing notice adjacent to the copyright notice for the Original Work:

Licensed under the Open Software License version 3.0

Grant of Copyright License. Licensor grants You a worldwide, royalty-free, non-exclusive, sublicensable license, for the duration of the copyright, to do the following:

- to reproduce the Original Work in copies, either alone or as part of a collective work
- to translate, adapt, alter, transform, modify, or arrange the Original Work, thereby creating derivative works ("Derivative Works") based upon the Original Work
- to distribute or communicate copies of the Original Work and Derivative Works to the public, with the proviso that copies of Original Work or Derivative Works that You distribute or communicate shall be licensed under this Open Software License

I agree to the above terms and conditions.

3. U konfiguraciji baze potrebno je uneti parametre koje ste dobili na mejlu. U delu „Web access options“ potrebno je promeniti „Admin path“ u putanju koja neće biti po pretpostavljenim vrednostima, kako bi se sprečili eventualni napadi i upadi u bazu (dodatna mera opreza). Nakon toga odabrati drugu opciju „Skip Base URL Validation Before the Next Step“, jer na serveru nemamo URL validaciju i nakon toga nastaviti sa procesom konfiguracije klikom na dugme „Continue“.

Nakon ovog koraka potrebno je sačekati neko vreme (5 – 10 minuta) kako bi se napravila baza i konfigurisao server sa unetim podacima. Ukoliko dođe do prekida i ne uspete da nastavite dalje, potrebno je da me kontaktirate putem mejla.

Configuration

Database Connection

Database Type
MySQL

Host *
localhost

You can specify server port, ex.: localhost:3307
If you are not using default UNIX socket, you can specify it here instead of host, ex.: /var/run/mysqld/mysqld.sock

Database Name *
2000140140

User Name *
2000140140

User Password

Tables Prefix

(Optional. Leave blank for no prefix)

Web access options

Base URL *
http://212.200.39.245/2000140140/

Admin Path *
admin

Additional path added after Base URL to access your Administrative Panel (e.g. admin, backend, control etc.).

Enable Charts
Enable this option if you want the charts to be displayed on Dashboard.

Skip Base URL Validation Before the Next Step
Check this box only if it is not possible to automatically validate the Base URL.

Use Web Server (Apache) Rewrites
You could enable this option to use web server rewrites functionality for improved search engines optimization.
Please make sure that mod_rewrite is enabled in Apache configuration.

Use Secure URLs (SSL)
Enable this option only if you have SSL available.

Session Storage Options

Save Session Data In
File System

* Required Fields

Continue

4. Nakon kreiranja baze, potrebno je uneti ime i prezime kao i email adresu. U sledećem polju uneti korisničko ime i lozinku (potrudite se da lozinka ima mala i velika slova, brojeve kao i specijalni znak). Unesite ključ za kriptovanje ili ostavite da Magento sam odredi ključ, ali morate ga zapamtiti odnosno zapisati.

5. Na sledećoj stranici je ispisan ključ za kriptovanje podataka, lozinki i kreditnih kartica, a ispod toga imamo dve opcije "Go to Frontend" i "Go to Backend".

Izgled frontenda:

Frontend je korisnički panel i to je glavni sajt koji posećuju korisnici

Izgled backenda:

Backend je administratorski panel i u njemu vršimo sve izmene vezane za sajt, kao i izgled Frontenda.
